

Pressure Blaster

LET'S TALK

Condition:

Used

Description:

Designed to deliver abrasives at higher velocities than suction systems, being ideal to maximise production rates. The Pressure Blaster can be 4 times faster, for most of the applications. Typically used for more demanding processes such as removing tight mill scale or finishing hard-to-reach surfaces.

TECHNICAL INFORMATION

Internal Dimensions: 1160mm (L) x 1800mm (W) x 1200mm (H)

External Dimensions: 1260mm (L) x 1840mm (W) x 5600mm (H)

Door Access: 1080mm (H) x 1480mm (W)
